COUNTY: Middlesex

PERMIT CATEGORY: EX 1309 / ES 1312 PERMIT NUMBER: _____

BUSINESS NAME: SeaQuest

OWNER/DIRECTOR: Dennis Ferreira

BUSINESS ADDRESS: _____

Toucan → adequate health. Food has a lot of flies

Sloth - no food bowl. Only fed sporadically. Sometimes hangs

veg on spinning hanger. Fed every hour. → depends on how much is left in her diet" measured out each day.

reptc - low water sleeping at time of visit. humidifier on timer.

has a checklist every hour to check on animals

BTS - fed 3x wk

Albino ball python - ok. lots of glue[?] on side + on some of decor.

has a California garter snake → was told it was ok via email.

Ball python has water + hides

* frilled dragon - off exhibit for medical care did not fill very little water

uro (back) - very little water

MT Slink → ^{full} empty water, fresh food

uro - sheds

Brw Tegu → appears healthy no interactions recorded

Cal King → appears healthy from what we can see

Russian tortoises look OK

No staff by otters, around corner. Not actively viewing otters

↳ only gets fed on the hour, also get a breakfast + a dinner

axolotl → 5 now only see 2, one is missing a portion of the limb. tests Wk Weekly.

Vet said ~~these~~ birds are off exhibit due to stress.

one G winged macaw rehomed.

other has severe feather plucking

BOTH birds checked every 30 min

Boty some plucking on shoulder → only one going on exhibit every other hour

Animal handling log (interactions) kept in back room

reptiles not brought out

if walked around on leash?

otter had very pungent smell. tubes cleaned every hour.

are daily logs not kept beyond that day? (wipe off board)

Each species has its own folder

None

Not sure why birds should be off display

all animals get annuals Atherosclerosis
