## Foreword

The NSW Aquaculture Industry Directory has been produced by Fisheries NSW to showcase the diversity of farmed seafood and ornamental fish available from New South Wales.

This directory is not inclusive of all producers in NSW. Due to privacy legislation, this directory only identifies those businesses that have nominated to be listed.

The directory enables buyers to contact growers/suppliers of farmed seafood. It also helps existing and prospective aquaculture operators to network with other industry stakeholders that are relevant to their current or proposed operations.

This directory also serves to demonstrate to potential investors that NSW aquaculture is an industry with sound infrastructure. As such, it forms an integral part of the NSW Government's aquaculture strategy that aims to ensure that NSW is able to capture a solid share of the growth in the aquaculture industry in Australia.

**Section 1** of the directory identifies producers of shellfish species (includes molluscs and crustaceans) farmed in New South Wales.

**Section 2** of the directory identifies finfish aquaculture producers in New South Wales.

**Section 3** of the directory identifies hatchery producers in New South Wales, including those accredited under the NSW Hatchery Quality Assurance Scheme.

**Section 4** of the directory identifies aquaculture producers that have tourism facilities.
